Ate_Macoke — Vegetation Trajectories

2019–2023 assessment | 2023 Landsat satellite background

VEGETATION TRAJECTORY

Recovery

Recovery to 2019 or partial recovery

Continued decline

Decline in both periods

Stable / mixed / disagreement

Includes uncertain trajectories

Ate_Macoke parcel boundary

MAP DETAILS

Background: Landsat 8/9, 2023

Trajectory years: 2019, 2022, 2023

Indices: NDVI and NDMI

Spatial resolution: 30 m

CRS: EPSG:32613

Exploratory threshold: ±0.05

Landsat Collection 2 Level-2 | Original classification pixels preserved | Not independent evidence of grazing impacts.
