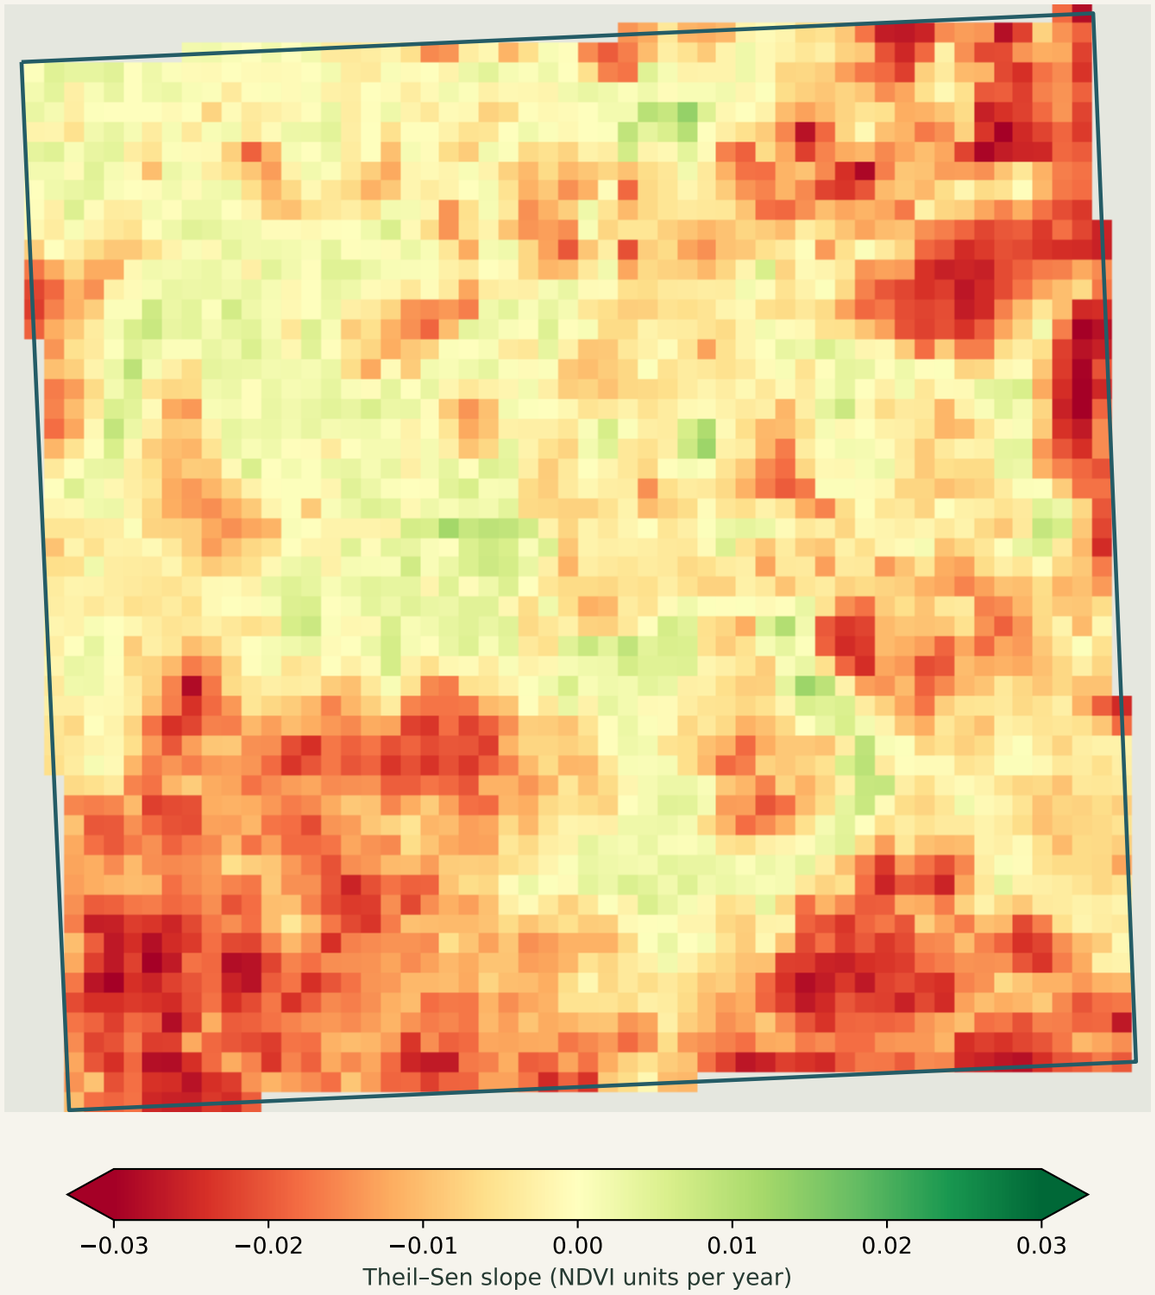
ENVIRONMENTAL DATA CUBE FOR OGLALA LAKOTA

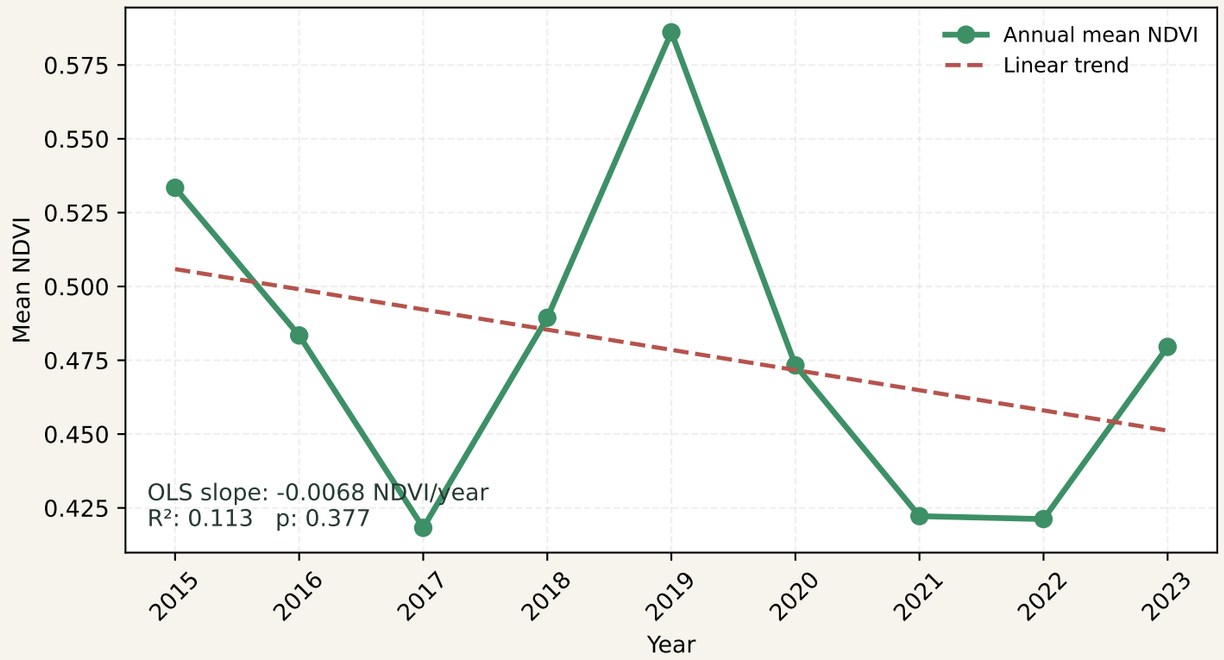
ATE_MACOKE | NINE-YEAR VEGETATION TREND

LANDSAT GROWING-SEASON NDVI • 2015–2023 • 30 M

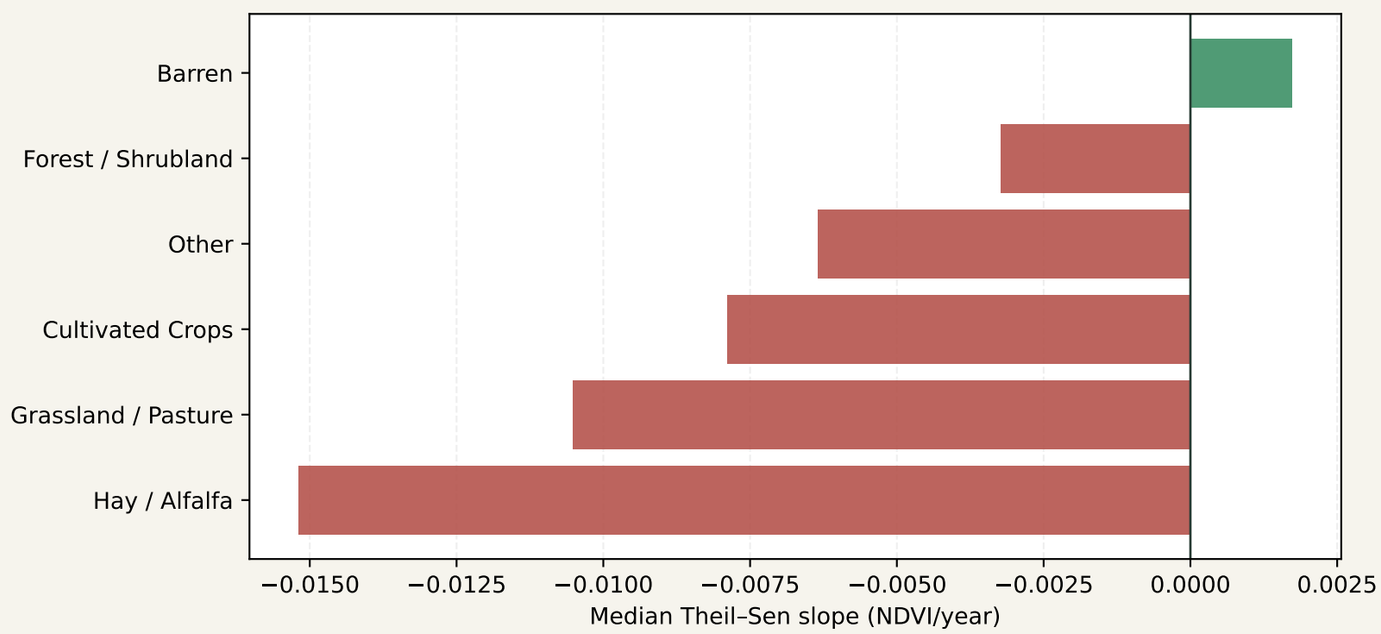
A / SPATIAL NDVI TREND



B / ANNUAL VEGETATION GREENNESS



C / TREND BY 2023 LAND-COVER CLASS



Theil–Sen slopes summarize changes across available annual NDVI observations (minimum 5 valid years per pixel). Negative slopes indicate declining greenness, not confirmed land degradation or grazing causation.

Land-cover classes use USDA CDL 2023. Land-cover change between 2015 and 2023 is not assessed.
