Ate_Macoke

Vegetation trajectories | 2019–2023

Source: Landsat Collection 2 Level-2 • 2023 true-color background • 2019–2023 NDVI/NDMI classification

Exploratory spectral trajectories; not independent evidence of grazing impacts.

VEGETATION TRAJECTORY

Recovery
Return toward 2019 conditions

Continued decline
Decline in both comparison periods

Stable / mixed / disagreement
Combined residual classification

Ate_Macoke parcel boundary

MAP DETAILS

Satellite imagery	Landsat 8/9, 2023
Assessment years	2019, 2022, 2023
Vegetation indices	NDVI + NDMI
Resolution	30 meters
Projection	UTM Zone 13N
Reference system	EPSG:32613
Change threshold	±0.05

INTERPRETATION NOTE

Visual smoothing does not alter source classification values or spatial resolution.
